VISIONS OF THE COSMOS

Visionary Astrophotography by Western Australian Astrophotographers

www.visionsofthecosmos.com

Carnarvon Library & Art Gallery, 18 Egan Street, Carnarvon, Western Australia
14 April 2023 to 20 May 2023.

Visions of the Cosmos is a collaboration by several of Western Australia's most accomplished astro-photographers. **Visions of the Cosmos** presents an extraordinary diversity of astrophotography, including night-time landscapes, constellations, deep space, planetary and timelapse. The result is a superb photographic and visual collection documenting the beauty and grandeur of the night, featuring Western Australian and international locations. The astrophotography is complimented by a display of astronomy related artifacts and ephemera.

Developed by Dr John Goldsmith, the founder of www.celestialvisions.com.au, a Western Australian research and astronomical image agency.

Hosted by the Shire of Carnarvon Library & Art Gallery and proudly sponsored by WA Tourism, Dark Sky Festival Carnarvon and Horizon Power, the exhibition is open to the public between 14 April and 20 May 2023. The exhibition is a major highlight of regional events relating to the Solar Eclipse of 20 April 2023.
